

1) Άνοιγμα αρχείου για εισαγωγή αρχείου με  
Vector

```
// account(int accountnum, QString accid,  
double gr) -> STRUCT
```

```
QString fn=QFileDialog::getOpenFileName(this,"FILE OPEN",  
".","txt, csv files (*.txt, *.csv)");
```

```
if(fn.size()==0)
```

```
{
```

```
    QMessageBox::critical(this,"ERROR","NO FILE SELE  
CTED");
```

```
    return;
```

```
}
```

```
QFile fp(fn);
```

```
bool ok=fp.open(QIODevice::ReadOnly | QIODevice:  
Text);
```

```
if(!ok) return;
```

```
QTextStream st(&fp);
```

```
while(!st.atEnd())
```

```
{
```

```
    QString line=st.readLine();
```

```
    if(line.startsWith("#")) continue;
```

```
    if(line.size()==0) continue;
```

```
    QStringList data=line.split(",");
```

```
    if(data.size()==0) continue;
```

```
    account acc;
```

```
    acc.accountnum=data[0].toInt();
```

```
    acc.accid=data[1];
```

```
    acc.grade=data[2].toDouble();
```

```
    accounts<<acc;
```

```
}
```

```
fp.close();
```

```
}
```

2. Αποθήκευση σε αρχείο του v2.txt.

```
QString fn=QFileDialog::getSaveFileName(this,"Save File",".",  
"txt, csv files (*.txt, *.csv)");
```

```
if(fn.size()==0)  
{
```

```
    QMessageBox::critical(this,"Error","No file selected");  
    return;
```

```
}
```

```
 QFile fp(fn);
```

```
fp.open(QIODevice::ReadWrite | QIODevice::Text);
```

```
QTextStream st(&fp);
```

```
for(int i=0; i<accounts.size(); i++)
```

```
{
```

```
    st<<accounts.at(i).accnum<<" - " <<accounts.at(i).accid  
    <<" - " <<accounts.at(i).gr<<endl;
```

```
}
```

```
fp.close();
```

```
}
```

Αποθήκευση εικόνας σε αρχείο.

```
QString fn=QFileDialog::getSaveFileName(this,"Save File",".",  
"txt, csv files (*.txt, *.csv)");
```

```
if(fn.size()!=0)
```

```
{ QPixmap pix=tab->grab();
```

```
    pix.save(fn,"png");
```

```
}
```

4) Άνοιγμα Αρχείου για φόρτωση εικόνας

```
QString fn=QFileDialog::getOpenFileName(this,"Open  
image",".", "txt, csv files (*.txt, *.csv)");
```

```

if (fn.size() != 0)
{
    pix.load(fn);
}
}

```

5. 'Αποφυγή Άποθήκευση' B.A

```

QString fn = QFileDialog::getOpenFileName(this, "Open/
SAVE DB", ".", "*.db files (*.db)");

```

```

if (fn.size() != 0)
{
    if (mgdb == nullptr)
    {
        mgdb = new database;
    }
    mgdb->setDatabaseName(fn);
}
}

```
